

## Feedback for RRMP Research Presentation [Formative]

Tutor completing formative feedback: Karen Outram	Student number: Shiraj Ali
Details of any extensions etc:	Submission Attempt: Formative

The formative is laid out to an excellent standard and it is clear that time and planning have taken place developing the content. One comment is to make sure the title [i.e: the topic] of what your intended study and discussion is, is detailed somewhere in the text before you start to write about it.

\*Just to say here as well Shiraj that the overall academic tone, in your academic writing style has really developed. It's clear that you are putting a lot of time and effort into this and it is reflected in your written formative. I just want to make that note here to continue with this approach when you finally engage in your summative dissertation.

The subject of e-learning that you have chosen is gaining momentum in teaching as an industry, as well as a support for the more traditional methodologies of teaching in a generic sense. It has a lot of currency as a subject, but also from a futures perspective.

Real and valid problems surrounding the Pandemic have been discussed which is good practice re the implementation of e-learning. Your research questions are focused and so there is a 'thread' there. Keep this focus and ensure that you are answering the 'main' question in the actual presentation itself but not splitting into too many tangents, [as you will not have the time or research scope to do this].

If you intend to gain primary research, you must anonymise this when you convert the data, and ensure that an ethical disclaimer is placed at the header of the survey for example. At this stage, please only use surveys to gain primary data, [I have also sent an announcement out regarding this point also].

Please refrain from 1:1 interviews etc and please **do not** engage people classed as vulnerable in your study or minors under the age of 18. It is not enough to gain an institutes clearance for interviewing under 18's/vulnerable people consent needs to be gained from parents/guardians of under 18's and people classed a vulnerable also. This is a long and complex process.

The best of luck regarding your summative now,

With best wishes

Karen
