

## Feedback for RRMP Literature Review Summative

Tutor completing summative feedback: Karen Outram	Student number: 250395
Details of any extensions etc:	Submission Attempt: First submission Second submission

Criteria and weighting	Level	Comments:
Knowledge and understanding of the topic/ issues under consideration (25%)	Very Good	There is very good breadth of knowledge in your content and you gave a holistic over view regarding how and why this type of learning implementation would be beneficial. You also responded to the key components that were required regarding the summative. As a viewer I was able to gain the essence of what the project would entail.
Use of relevant sources (10%)	Excellent	Excellent use of relevant resources and its clear that you have sourced a good cross-section of information to inform your outcome. There is regular citation occurring in the text, both written and orally. Continue with approach moving forward for future summative
Criticality (25%)	Very Good	Very good sense of criticality with lots of discussion taken from theory-based platforms and applied to current 'real world' scenario's. There is some debate occurring in the content and that is something to focus on again, moving forward for your next summative. Just a comment as well on the questions that you have posed for your research in the presentation; don't have too much breadth in the context because any study that you complete through these modules will be relatively small scale. There is focus in the questions but small scale studies can only accommodate so much deep research of a particular nature, and so bear this mind. Keep research questions very tight and be mindful of any tangents etc.
Structure and Presentation (10%)	Excellent	Structure and presentation of the power point are completed to an excellent standard. The content and context of the power point is well thought through and the visual cohesion/text application is balanced.
Presentation and Communication Skills (30%)	Very Good	Very good presentation and communication skills. The presentation was clearly very well thought through and you articulated the content well. There is some hesitancy here and there, but that is a minor comment. Also, just one other small detail, when resuming recording try to keep your volume levels consistent.

Overall
<p><b><u>Positives:</u></b></p> <ul style="list-style-type: none"><li>• Overall, a very good outcome</li><li>• With excellent use of relevant resources</li><li>• And excellent structure and presentation</li></ul> <p><b><u>Points for development:</u></b></p> <ul style="list-style-type: none"><li>• Just watch the volume level when cutting in and out of delivery to ensure consistency</li><li>• Keep any research questions very focused</li><li>• This in turn will allow you to get some real depth in your discussion regarding application of deep research</li></ul>
